Template Reparser

Reparse-Optionen

einfaches Reparsen

Die ausgewählten Dokumente werden mit verändertem Templating erneut gerendert und die Änderungen mit der Datenbank synchronisiert.

schnelles Reparsen

Wie einfaches Reparsen, nur ohne die Synchronisation der Datenbank. In der Regel ändern sich beim Reparsen keine Metainformationen, sodass eine Synchronisierung nicht nötig ist. Dennoch: Es gibt jedoch einige fortgeschrittene Templating-Methoden, die eine Synchronisierung erforderlich machen. Erfahren Sie mehr in der Dokumentation.

Workflow-Import

Mit dieser Option importieren Sie alle ausgewählten Dokumente in den jeweiligen Workflow. In der Regel ist diese Option nur hilfreich, wenn es in den hinterlegten Workflows eine Weiche für die nicht-interaktive Verarbeitung beim Reparsen gibt. Andernfalls werden alle Dokumente im ersten interaktiven Workflowschritt auf dem Schreibtisch stehen bleiben. Erfahren Sie mehr in der Dokumentation.

Veröffentlichungs-Optionen

Zur Veröffentlichungsliste hinzufügen

Die ausgewählten Dokumente werden nach dem Reparsen zur Veröffentlichungsliste hinzugefügt und müssen von dort manuell veröffentlicht werden. Bitte beachten: Dokumente, bei denen das Veröffentlichungsdatum auf einen Zeitpunkt in der Vergangenheit gesetzt ist, werden trotzdem direkt veröffentlicht.

Zur Veröffentlichung freigeben

Die ausgewählten Dokumente werden nach dem Reparsen zur Veröffentlichungsliste hinzugefügt und als fällig für die Veröffentlichung markiert. Sie werden also sobald wie möglich vom Hermes-Dienst veröffentlicht werden.

Sofort veröffentlichen

Die ausgewählten Dokumente werden nach dem Reparsen sofort am Hermes-Dienst vorbei veröffentlicht.
